FIREFIIGHTERS, MEDICAL GROUP TEAM UP FOR LIFE SAVING TRAINING

By Tech. Sgt. Daniel Gagnon, 134 ARW Public Affairs

MCGHEE TYSON AIR NATIONAL GUARD BASE, Tenn. (Oct. 2, 2016) – The 134th Air Refueling Wing Fire Department and Medical Group joined forces for vehicle extrication training Oct. 2, 2016 here.

This is the first joint training to take place between the fire department and clinic personnel on auto extrication, emergency treatment procedures, and safety procedures for an accident scene.

Members of the 134th Air Refueling Wing Fire Department and Medical Group train together on how to extricate a victim from a car during a mock vehicle accident. (U.S. Air National Guard photo by Tech. Sgt. Daniel Gagnon, 134 ARW Public Affairs)

“This is the first joint training of this scale with the base clinic and fire department, where both groups learn and interact with each other to be better prepared for a real emergency,” said Capt. Ryan Bailey, a full-time firefighter at the 134th Fire Department who also serves as a clinical nurse with the medical group on drill weekends.

Pig organs were donated by a sausage producer for use for practice intubations and emergency treatment procedures.

“With the hands on portion, you are going to learn your basic fundamentals,” said Bailey. “When the real emergency happens the learning curve is over. This is a relaxed way to learn the basic fundamentals and that way you can apply them if you ever run into a real situation.”

The fire department used Hurst e-draulic equipment better known as “The Jaws of Life” for the practice extrication of victims. It is some of the

newest battery operated equipment that Hurst has come out with in the past five years.

“It increases our ability to be mobile,” said Master Sgt. Clint Montgomery, System Chief of Operations and Fire Protection at the base fire department. “We can take it inside aircraft and collapsed buildings, we are not restricted by hoses and cords that would tie us down. We can go where we need to, to affect the rescue.”

“It’s all about saving lives,” said Montgomery. “It’s some of the best equipment I’ve ever used.”

The 134 ARW personnel are constantly training and preparing to assist our communities and families for when (or if) the need arises.

Information Assurance Awareness: Staying aware of cyber threats!

Submitted by TSgt Adam Huskey, 134th Communications Flt

Cyber Defense in an Imperfect World, A New Approach - October 27, 2016

Cyber security has become a persistent topic in the nation's boardrooms and C-suites, and it's a complex problem that is often oversimplified and misunderstood.

The cyber threat landscape is multidimensional and subject to evolving threats by a variety of actors and sophisticated hacking tools. There are many technologies and protocols to help mitigate cyber threats, but there is really no panacea. A comprehensive strategy of risk management is still the best cyber defense.

Most current strategies of cyber defense usually incorporate a five-stage cycle of risk management components:

1. Identify the most critical assets
2. Protect by controlling access
3. Detect any intrusions
4. Respond to contain the intrusion
5. Recover by restoring to normal operation

This framework is solid, but poses challenges; thinking outside the box might make for a good number six on the risk management matrix.
